Glass of  
option!

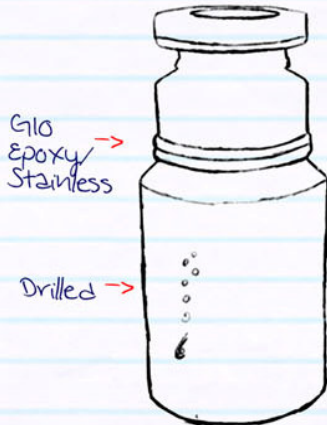

What if.... We took the best steel footvalve and just replaced the parts that prematurely corrode and fail?? (body & basket strainer)

# THE POLY FOOTVALVE

## FOOTVALVES: POLY

Poly housing with Stainless Steel & G-10 Glass Epoxy  
Or  
Galvanized Steel Valve Assembly

- Full Polyethylene body contains the mechanically sensible valve assembly
- Extremely efficient flow characteristics through the full range
- Full bore maxi stub gives the benefit of nominal ID and full face sealing (eg. 250mm stub used a 200mm Backing plate)
- Galvanized or stainless 316 - G-10 composite valve flap and flange option across the entire range of footvalves

\*  $K' = 1.2$  - K Factor way better than anything we have come across normally - 2.5 \*

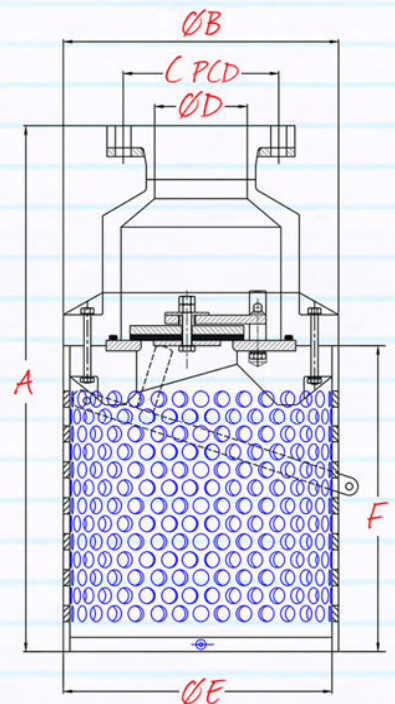

### Why the G-10 and not Steel?

- Chemical resistance as broad as Stainless Steel 316.
- Mechanical qualities similar to steels.
- G10 Epoxy/glass composite.
- It's the perfect choice for a long service life to do its extreme corrosion and weather resistance as well as temperature stability.
- Perfectly flat surface.
- Will eliminate crevice corrosions, (a problem for Stainless Steel).

Sales Meeting 2pm!

### Standard Arrangement

FOOT VALVE	METAL		GENERAL DIMENSIONS						
	316 SIS	MS GALV	A	ØB	C PCD	ØD	ØE	F	
FVP-100	STD	STD	590	300	178 (4')	106	300	345
