DRIP TORCHES

APRIL 2026

RODNEY INDUSTRIES

Pricebook | Effective April 1, 2026

Don't play with fire... Choose Rodney Industries' Firebugs

For over half a century, the FireBug Drip Torch has been at the heart of Rodney Industries – our first product and still the trusted choice for fire professionals across Australia.

Built to AS/NZS 2906, each FireBug is produced with uncompromising quality controls, including full canister pressure testing and batch inspection processes that ensure reliability in the field. The FireBug design has also passed rigorous destructive testing by NATA-accredited engineers, reinforcing its durability and safety.

From local brigades to national fire authorities, FireBug remains a proven tool for controlled burning and effective fire management.

Disclaimer:

Back burning equipment should be used by trained, experienced personnel only. Precautions should be taken to prevent danger to yourself and others. A means of escape should always be located before setting fires where rapid spread may prove hazardous to yourself or others. All petroleum products should be handled with the same precautions as when working with fuel. Keep torch in good working condition, make sure all connections are tight, inspect on a regular basis and replace any damaged parts with original replacement parts only.
